

Kawasaki KH250

KH250: Kawasaki's unique 3 cylinder 250 is smooth all round.

Responsive power and low weight from the only 250 cc 2-stroke triple in the world max. riding excitement for the sophisticate. KH250 is a machine of class and character, exceptionally smooth in every department.

Three cylinders running a 2-stroke cycle provide much more smoothness and zest than you'd expect from 250 cc. Minimum moving parts keep vibration and mechanical noise low, and three separate mufflers add the growl of a much bigger machine.

Rider convenience is the watch-word in instrumentation. Speedometer and rev counter are large, easy to read and well illuminated for night; warning lights are centrally positioned in a compact vertical arrangement for at-a-glance recognition.

Deep-stroke telescopic forks cushion out road shocks and provide sure-footed front-end control; the powerful disc brake has real benefits in smoothness of control, especially at high speed.

Rear end features 5-way adjustment to balance out rider weight and road condition, plus powerful rear brakes with drum-mounted lining wear indicator and large, high-visibility brake lights.

A master fuse, and supplementary fuses for the side and head lamp circuits, provide sensitive protection for electrical components, and make identification of faults fast and simple.

Sporty livery in candy lime green with dramatic follow-through linear graphics highlight KH250's individuality. Neatly styled side covers and rakish pipes add an extra touch of designer flair. Here is the bike for the man-about-town; the riding sophisticate who wants unique character for his riding satisfaction.

KH250 Exclusive character in a luxury 250.

UK model is shown.
