

 **Kawasaki**
'79~'81 Model

**MODEL
RECOGNITION
MANUAL**

Foreword

This Model Recognition Manual has been issued in order to provide the dealers with enough information to distinguish one model from another when a motorcycle is brought to the dealer for troubleshooting or repair. All motorcycles exported from 1978 to 1980 on are listed in order of nominal engine displacement and refer to the Model Recognition Manual (P/No. 99930-1001-01) for other models (from 1963 to 1977). Under each engine size, further classification is by model and year. Charts in the rear of the manual give production years and export area information.

1. Photographs

Since the photographs show the standard exported motorcycles, there may be minor difference in appearance between the picture and the actual motorcycle. For example, the motorcycle exported to some countries may have a different handlebar or fender, or may have no turn signal lights, reflectors or seat band.

2. Nicknames

The nickname of the model is given in parentheses. Some models are most often called by the nickname.

3. Model Year

The model year under the model code shows the approximate year of production.

4. Specifications

Major specifications, spark plug type, and tire size are given for the first year of the model, and apply to all the other years unless changes are noted. Refer to the Service Handbooks for further specifications.

5. Color

Color is one of the most effective means of recognizing the model. Colors of the fuel tank and front fender are given for this identification. When ordering the painted parts, be sure to include the color code from the Parts Catalogue.

6. Engine and Frame Numbers

Engine and Frame Numbers along with the prefix will give you positive identification. The “ ~ ” mark following an engine/frame number indicates that the number shown is the first number used for that model and year (Ex: G4E077300 ~). Zeros at the end of the number show how many digits you can expect to find (Ex: G7E500000).

7. Part Numbers of the Parts Catalogue, Owner's Manual, and Service Manual (Shop Manual)

These part numbers are given so that the correct parts Catalogue or Manual will be used when servicing the motorcycle or ordering the parts. A circled letter ahead of the part number indicates that the catalogue or manual is available in the language of that country as well as in English. The letters stand for the following countries.

- (A) Australia, (C) Canada, (D) Indonesia, (E) Europe, (F) France, (G) General export, (L) Lincoln Factory, (N) England, (S) Spain, (T) Thailand, (U) U.S.A., (W) West Germany, (Y) Norway

A Parts Catalogue number followed by an “R” or “S” indicates that it is a revision or supplement, and must be used together with the basic parts catalogue.

8. Remarks

This gives you the features of the model, relationship to other models, or differences in appearance from other similar models.

9. Major Changes

Major changes from the previous year's model are given here for comparison.
